

ABSTRACT OF THE DISCLOSURE

5 An assembly for a vehicle seat includes an air bag module having an inflatable air bag, and a trim cover that covers at least a portion of the air bag module. The trim cover further has a deployment seam for allowing the air bag to deploy through the trim cover. The assembly also includes an air bag deployment member that substantially circumscribes the air bag module. The deployment member is connected to the trim cover on only one side of the deployment seam.
